Indulgence Decisions

WEEKDAY VS WEEKEND

Weekday

BPM: 96-102
Energy: 44-50%

Weekend

BPM: 97-104
Energy: 46-53%

RETAIL PSYCHOLOGY EFFECTS

- Slower tempo correlates with longer browsing
- Emotional comfort increases discretionary purchases
- Reduced cognitive load improves confidence
- Premium sound increases perceived product value

Key Achievements & Next Steps

System performance and optimization roadmap

ACHIEVEMENTS

- Premium aligned music system deployed
- Zero repetition algorithm functioning
- Dynamic time-of-day adaptation active
- Mood intelligence validated
- Behavioral pacing optimized
- Brand alignment score: 92/100

NEXT STEPS

- Correlate hourly sales with music intensity
- Introduce seasonal instrument layering
- Temperature-linked warmth shifts
- A/B testing emotional energy bands
- Humidity-based sonic softness adjustment
